World Crop Production

WCP-02-86
February 1986

PRODUCTION HIGHLIGHTS FOR 1985/86

WHEAT: World production for 1985/86 is estimated at 503.4 million tons, down 0.7 million or less than 1 percent from last month and down 2 percent from last year's record harvest. Important changes from a month ago include the following:

- o Argentina Production is estimated at 8.5 million tons, down 1.0 million or 11 percent from last month and down 36 percent from last year's crop. The decline is primarily attributed to lower than expected yields in southern growing areas. The harvest is virtually complete.
- o EC-10 Production is estimated at 66.1 million tons, down 0.1 million or less than 1 percent from last month and down 14 percent from last year's record crop. A decline in estimated production in Denmark more than offset an increase in West Germany.
- o Iran Production is estimated at 5.3 million tons, up 0.3 million or 6 percent from last month and up 18 percent from last year's crop. The increase is attributed to higher yields.
- o Iraq Production is estimated at 0.6 million tons, up 0.1 million or 20 percent from last month and up 140 percent from last year's drought-reduced harvest. Favorable weather increased the yield estimate.

COARSE GRAINS: World production for 1985/86 is estimated at a record 843.8 million tons, up 3.4 million or less than 1 percent from last month and up 4 percent from last year. Important changes from a month ago include the following:

- o United States Production is estimated at a record 274.3 million tons, up 3.4 million or 1 percent from last month and up 15 percent from last year. Higher estimated average yield led to a 3.8-million-ton increase in corn production. Higher estimated area but lower estimated yield led to a 0.4-million-ton decline in sorghum production.
- o China Production is estimated at 83.9 million tons, down 1.0 million or 1 percent from last month and down 12 percent from last year. Lower estimated yields are the reason for the reduction in sorghum (-0.5 million tons) and millet (-0.5 million tons) production.
- o Other W. Europe Production is estimated at 28.4 million tons, down 0.3 million or 1 percent from last month and down 1 percent from last year. The decline is attributed to lower estimated production in Spain, Sweden, and Portugal.
- o Argentina Production is estimated at 18.0 million tons, down 0.3 million or 2 percent from last month and down 3 percent from last year. An increase in estimated corn production (+0.7 million tons) was more than offset by a decline in sorghum production (-1.0 million tons).
- o South Africa Production is estimated at 9.0 million tons, up 1.0 million or 13 percent from last month and up 19 percent from last year's harvest. The increase is due to favorable January weather and higher estimated area.
- o Philippines Production is estimated at 3.9 million tons, up 0.5 million or 14 percent from last month and up 12 percent from last year's crop. The increase in corn production is attributed to higher estimated yield.
- o Australia Production is estimated at 8.7 million tons, up 0.3 million or 3 percent from last month and up 1 percent from last year's harvest. An increase in estimated sorghum production more than offset a decline in the oat crop.

RICE (MILLED-BASIS): World production for 1985/86 is estimated at 313.7 million tons, virtually unchanged from last month but down 1 percent from last year's record crop. Important changes from a month ago include the following:

- o Philippines Production is estimated at 5.6 million tons, up 0.1 million or 3 percent from last month and up 6 percent from last year's crop. The increase is attributed to higher yields.
- o Brazil Production is estimated at 6.0 million tons, down 0.1 million or 2 percent from last month and down 2 percent from last year. The decline is attributed to a decrease in estimated area.

OILSEEDS: World production for 1985/86 is estimated at a record 194.2 million tons, up marginally from last month and up 3 percent from last year. U.S. production is estimated at 65.5 million tons, down 1.0 million or 1 percent from last month, but up 11 percent from last year. Foreign production is estimated at a near-record 128.7 million tons, up 1.0 million or less than one percent from last month, but down 1 percent from last year's record.

- * Soybeans: World production for 1985/86 is estimated at a record 94.1 million tons, down 1.8 million or 2 percent from last month, but up 3 percent from last year. Important changes from last month include the following:

- o Brazil Production is estimated at 12.5 million tons, down 1.0 million or 7 percent from last month and down 27 percent from last year. Recent FAS field travel indicates prolonged drought has lowered production prospects, particularly in Rio Grande do Sul and Parana.
- o United States Production is estimated at 57.1 million tons, down 0.8 million or 1 percent from last month, but up 13 percent from last year. Area and yield have been revised downward slightly; however, estimated average yield is a record.
- o Paraguay Production is estimated at 0.5 million tons, down 0.1 million or 17 percent from last month and down 33 percent from last year. Drought in the eastern part of the country has resulted in reduced production prospects.

EXCHANGE Rec'd
FEB 26 1986

- * Cottonseed: World production for 1985/86 is estimated at 31.6 million tons, up 0.1 million or less than 1 percent from last month, but down 6 percent from last year. An important change from last month is the following:
 - o Pakistan Production is estimated at a record 2.4 million tons, up 0.2 million or 10 percent from last month and up 18 percent from last year. Higher than expected yields due to favorable weather during the season are being reported.
- * Peanuts: World production for 1985/86 is estimated at a record 20.6 million tons, up 0.9 million or 5 percent from last month and up 4 percent from last year. An important change from last month is the following:
 - o China Production is estimated at a record 6.6 million tons, up 1.0 million or 18 percent from last month and up 37 percent from last year. Production in Shandong, the major producing province, was reported at 2.75 million tons, up over 50 percent from last year.
- * Sunflowerseed: World production for 1985/86 is estimated at a record 19.1 million tons, up 0.5 million or 3 percent from last month and up 7 percent from last year. Important changes from last month are the following:
 - o Argentina Production is estimated at a record 3.5 million tons, up 0.3 million or 9 percent from last month and up 3 percent from last year. Favorable weather during the growing period has increased yield prospects.
 - o China Production is estimated at a record 1.9 million tons, up 0.2 million or 12 percent from last month and last year. Production is up significantly due to a record planted area of 1.2 million hectares.
- * Rapeseed: World production for 1985/86 is estimated at a record 18.8 million tons, up 0.2 million or 1 percent from last month and up 12 percent from last year. An important change from last month is the following:
 - o India Production is estimated at a record 3.2 million tons, up 0.2 million or 7 percent from last month and 6 percent from last year. Production is increased due to favorable weather and less intercropping.
- * Flaxseed: World production for 1985/86 is estimated at 2.5 million tons, down marginally from last month, but up 16 percent from last year.

- * Copra: World production for 1985/86 is estimated at 5.1 million, up 0.1 million or 2 percent from last month and up 4 percent from last year. An important change from last month is the following:
 - o Philippines Production is estimated at 2.0 million tons, up 0.1 million or 6 percent from last month and up 8 percent from last year.
- * Palm Kernels: World production for 1985/86 is estimated at a record 2.3 million tons, unchanged from last month, but up 5 percent from last year.
- * Palm Oil: World production for 1985/86 is estimated at a record 7.6 million tons, up marginally from last month and up 9 percent from last year.

COTTON: World production for 1985/86 is estimated at 81.7 million bales, up 0.3 million or less than 1 percent from last month but down 7 percent from last year's record crop. U.S. production is estimated at 13.5 million bales, unchanged from last month. Foreign production is estimated at 68.1 million bales, up 0.3 million or less than 1 percent from last month but down 8 percent from last year's record. Important changes from last month include the following:

- o Pakistan Production is estimated at a record 5.5 million bales, up 0.5 million or 10 percent from last month and up 19 percent from last year. Ideal weather during the growing and harvesting periods resulted in record estimated yields.
- o USSR Production is estimated at 12.1 million bales, down 0.2 million or 2 percent from last month, but up 2 percent from last year. The change is based on lower yield estimates.

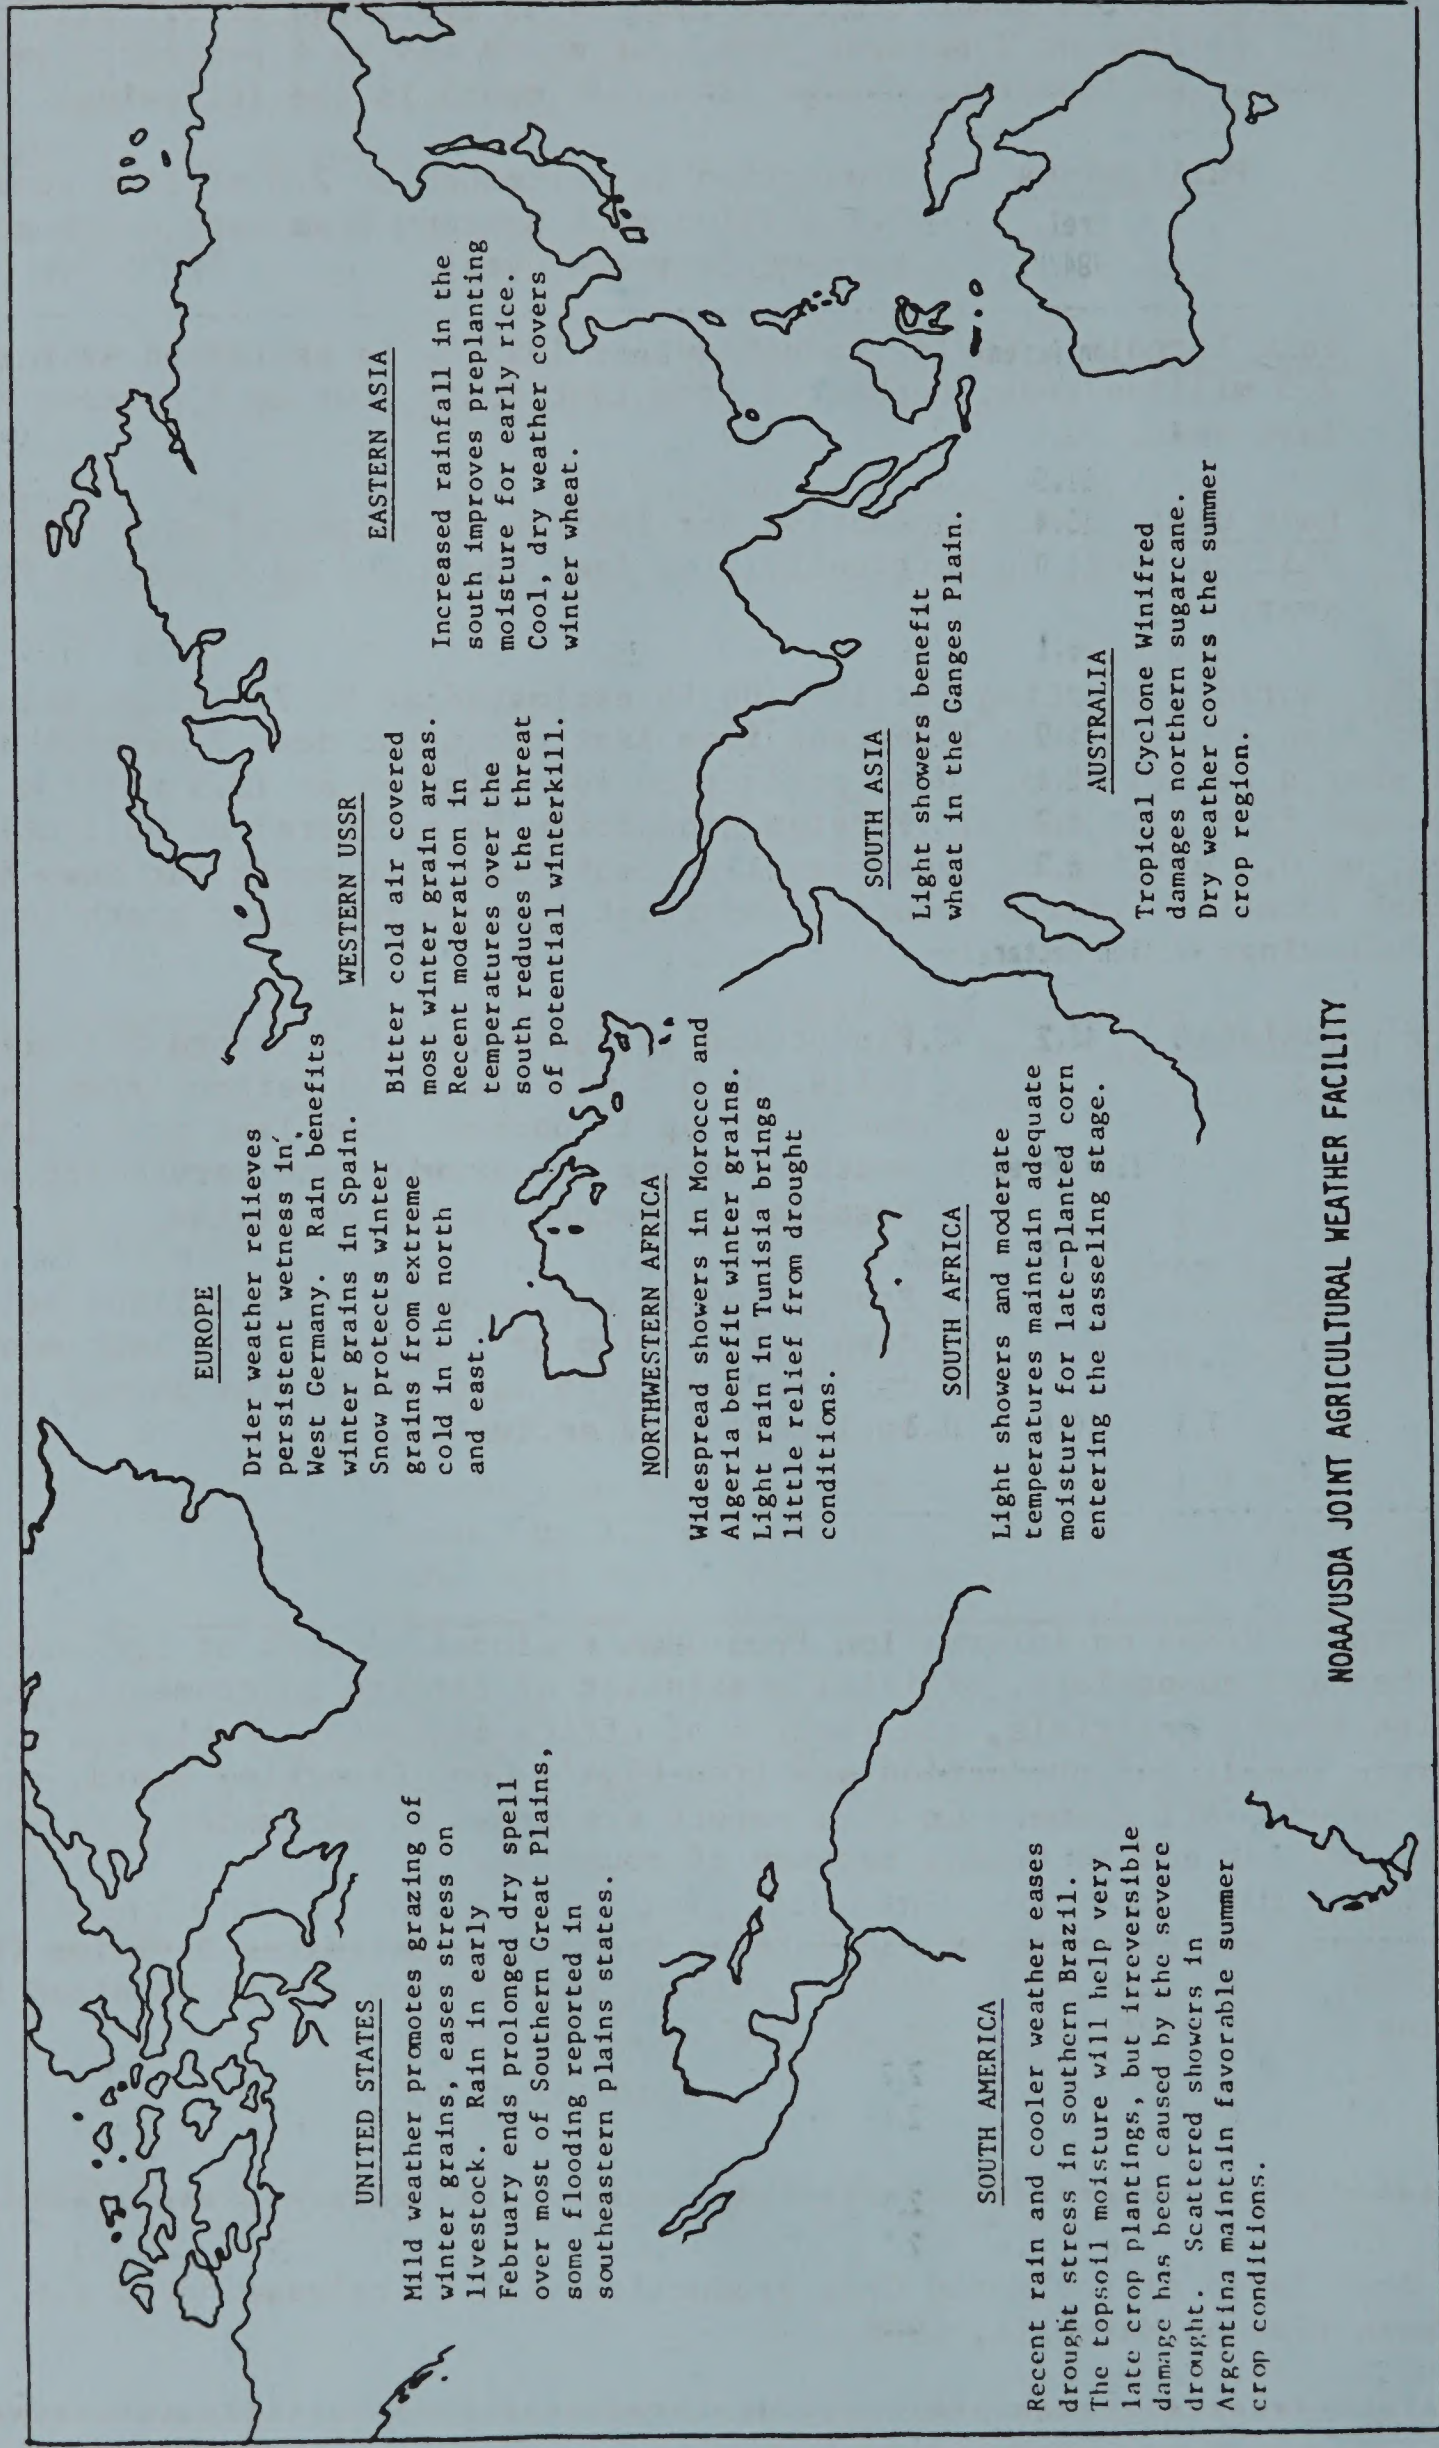

This report draws on information from USDA's global network of agricultural attaches and counselors, official statistics of foreign governments, other foreign source materials, and results of office analysis. Estimates of U.S. acreage, yield, and production are from USDA's Crop Reporting Board, except where noted. All numbers in this report are based on unrounded data and detail may not add to totals because of rounding.

This report was prepared by the Foreign Production Estimates Division (FPED), FAS/USDA, Washington, D.C. 20250. Further information may be obtained by writing to the division or by calling (202) 382-8888.

---Million Metric Tons---

---Million 480-Pound Bales---

1/ Includes total of wheat, coarse grains, and rice (milled) shown above. Estimates of Soviet total grain production, including wheat, coarse grains, rice (rough), minor grains, and pulses are 190 mil. tons in 1983/84, 170 mil. in 1984/85, and 190 mil. forecast in 1985/86.

2/ Totals for major regions and countries and other countries include the six major oilseeds shown elsewhere in this report, while world and total foreign also include copra and palm kernels for countries shown plus other countries.

Note: Entries of '.0' indicate no reported or insignificant production.

SOUTH AFRICA: CORN AREA

SOUTH AFRICA: CORN YIELDS

SOUTH AFRICA: CORN PRODUCTION

FEBRUARY 1986

FOREIGN PRODUCTION ESTIMATES DIVISION, FAS, USDA

South African corn production has varied from 4.1 to 14.6 million tons in the past decade. Area has, until this year, shown a steady decline. Corn yields are volatile and highly influenced by January and February weather.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today.

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE. Mail this form to: Foreign Agricultural Service
